Jackie Coogan

—IN—

"A Boy of Flanders"

Adapted from Ouida's "A Dog of Flanders"

Also a good two reel comedy

CLARESHOLM LOCAL NEWS

Miss Bessie Ross of Detroit is visiting with Mr. and Mrs. C. W. Stewart.

Jackie Coogan in "A Boy of Flanders" at the Rex theater on Friday and Saturday nights this week.

The regular meeting of the U. F. W. A. will be held on Friday September 25 in the rest room, at the usual hour.—Sec.

R.K. Peck of Edmonton spent a few days in town this week and did some organization work for Woods Orphan Home while here.

Mr. and Mrs. Charles Day have returned home from Banff where they have spent several weeks. Mrs. Day is much improved in health.

Mr. Chas. Clough of Winnipeg was a visitor in town last Wednesday and renewing acquaintances with Mr. and Mrs. C. W. Stewart.

Members of Foot Hill Lodge No. 13, I. O. O. F., are reminded that the regular meeting will be held on next Monday night, Sept. 21st. Visiting brothers welcome.

All electric light patrons are warned against using fuse plugs of more than 15 amperes. The use of fuse plugs of higher amperage greatly endangers your property.

Little Mildred Peck, oldest daughter of R.K. Peck, formerly of Clareholm, was married on August 15th to Charles Dean Reynolds of Ponoka.

Services will be held in St. John's church on Sunday next, September 20, at 11 a.m. and 7:30 p.m. In the evening the local Masonic Lodge will attend the service in a body. A hearty welcome is extended to all to attend these services. The Sunday school will be held at noon.

The School Fair, which was postponed until Monday next, will be held at the School of Agriculture. Children are asked to bring in their exhibits as early as possible, as judging will begin around 10 a.m. The teachers are requested to have their pupils in readiness for the sports at 11 a.m.

The Woods Orphan Home is putting on a campaign for funds this fall. The Home badly needs additional accommodation. Applicants are being turned away nearly every day. It is planned to raise sufficient to take care of 200 children. A worthy and needy cause such as this should appeal to the sympathy of all.

Wet weather is still holding up threshing and damaging grain in the stock. Wednesday there was rain, turning into snow which melted as it fell, and rain is again falling as this record closes. There was some frost Thursday morning, which does not appear to have done any material damage to gardens at this point.

Last Monday evening, at the Nazarene parsonage, the young people of the church held a surprise party in honor of Mr. Chester Laing, who is leaving for the Nampa college next week. He was presented with a leather travelling bag, as a token of the appreciation in which he was held by the Nazarene Young People's Society. Mr. Laing will preach his farewell sermon next Sunday morning.

At Cochrane races on the 12th inst. Babaroch Fox won the three-fourths mile dash, ridden by Kipling. He was also started the same day in the mile dash, ridden by F. Shipton, when he was beaten by Brown Jug whom he had previously defeated. Shipton dropped his whip shortly after starting which had something to do with the defeat of Fox who is a lay horse and usually runs under the whip. Shipton earned great praise for his winning the hurdle race on Homelut which has been recently training at Clareholm. Homelut whipped round at the start and was left 100 yards but Shipton rode him patiently and caught the other runner two at the last jump and won easily, the distance being 1 1/2 miles.

BRANDON OPERA COMPANY COMING

Will Present "The Mikado" at Rex Theater on Monday September 21

Manager Edmund of the Rex theater is proud to announce that he has secured the Brandon Opera Company for one performance at the Rex theater on Monday next, September 21st. The company is one of the largest and best singing organizations that has ever appeared in Clareholm and it was only accidental that they were able to play a date here, which by the way is the only city on the Macleod Branch that gets the attraction, and perhaps the smallest city that the company will play during their entire tour.

The offering will be Gilbert and Sullivan's brightest comic opera, "The Mikado." With a cast of more than thirty singing voices and a colorful scenic production and bright, snappy costuming, the attraction is one that local music lovers and theatergoers will remember for many days.

Several of the local music lovers were fortunate enough to hear the company when they were at the Grand Theater in Calgary last spring. "The Mikado" is considered the best opera in their entire repertoire.

There is nothing left unwritten or unsaid about "The Mikado." The gay humor of W. S. Gilbert's book and lyrics and the haunting melodies of Sir Arthur Sullivan's music, have in the last forty years been the theme of uncountable words of praise. None of the operas of this brilliant team has more merit than "The Mikado," and no matter how often it is done, it is unailing in giving pleasure. Very much like the potato to Pat: "It may be good or it may be better but it is never bad."

Both the music and the story of "The Mikado" are thoroughly popular. It has been one of the most popular operas ever written. It was first produced in 1885 and this being the fortieth anniversary, was one of the things that prompted Brandon Brothers to give it this Canadian tour.

Brandon Brothers have given "The Mikado" a very beautiful scenic and costume production and a cast that will be long remembered by local theatergoers and music lovers. Every principal in this worthy organization possesses a singing voice of unusual quality and the vocal attainments of the cast do not stop with the principals for the chorus is made up of unusually fine voices. The result cannot fail to be one of the finest musical treats that the city has enjoyed in many seasons.

Elks Institution

Tony McKinley, Elk organizer, announces that as threshing will be finished much sooner at Vulcan than in these parts, Vulcan Lodge will be instituted on October 8th, and Clareholm Lodge about two weeks later. He will be in Clareholm for a day or two during the latter part of this month.

IN THE DISTRICT COURT OF THE DISTRICT OF MACLEOD

In the Estate of Henry Reinhart, late of Clareholm in the Province of Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named Henry Reinhart, who died on the 23rd day of April A. D. 1925, are required to file with the undersigned J. R. Watt, Solicitor for the Executor, by the 25th day of September A. D. 1925, a full statement of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

Dated this 25th day of July, A. D. 1925.

J. R. Watt,
Solicitor for Charles N. Booth the Executor,
Clareholm, Alberta.

Stop! Look! Listen!

Within the short space of less than the life of a generation the automobile has worked a complete revolution in modes of transportation and in the lives of people. But owing to the recklessness of so many drivers of cars it has become a veritable nightmare to the commonplace engineers. To a greater extent than anything else it is the cause of nervous breakdowns among trainmen.

This is the case of speed, and thousands of motorists delight in tearing along roads and over railway crossings at top speed although there is no need for haste. They know the fact that there is more real pleasure to be derived from leisurely driving, and that a moment's stop at a level railway crossing to allow a passenger train to pass is not a time they want to risk their lives. They run, and every year hundreds pay the full penalty of their folly, while other hundreds have come to remember in pain and permanently crippled condition the terrible price they are paying on account of their heedlessness.

But there is another side to the picture, and a locomotive engineer of the Pennsylvania Railroad has written an article, appearing in the Outlook, in which he describes just what the reckless motorist who tries to "beat" a passenger train is the crossing, costs the engineer in nerve stability, and the "consequent danger to every passenger on the train. This article is so convincing and so timely that it is worthy of repetition. The locomotive engineer is a question writer.

"Come and take a ride with me in the cab of my engine. I am going to take you at the rate of sixty miles an hour, which means that sometimes I will go considerably faster than that. There will be difficulties. Perhaps I should tell you in advance of some of the things you will see—and feel."

"There are grade-crossings, you know. The crossings are not dangerous, but the automobile creates a danger. I do not recall many trips when I did not have some one to take close calls. At particularly every grade crossing without guard rails some driver goes over after the whistle has been sounded. And where there are guard rails, they sometimes smash their cars down and so on just the same. I believe you will understand the nature of the trouble better if I give you one or two specific instances."

"On the fifteenth of last January I took my run out at 5.41 a.m. An hour later I was driving along at reduced speed, probably forty miles an hour. I wanted to know how fast a car could go. When within about 150 feet of the crossing I saw lights bobbing around on the planks. That I directed as automobiles—in motion. My friend, as it afterwards learned, was looking directly at the car. It did not occur to him at first that the driver would try to get across. They saw him 'give her the gas.' Those bobbing lights, however, had enabled me to divine the driver's intention. I snapped the brake valve to full emergency position."

"We were three hundred feet past the crossing when the train stopped, but the emergency application of the brakes had stayed the engine the instant that it took for the automobile to get over those rails. The friend in a momentary voice asked me, 'Did he get over?' I answered, 'Yes, he did. The friend got up from his seat' came over to the gangway at the right side, and, taking as though that driver might be getting every word, said, 'Old fellow, do one but don't send you!'"

"From that instant for the balance of the trip there was an engineer in the cab whose nerves were not fit for his job. Little clicks and knocks were so magnified as to make it seem that the engine was falling to pieces. While crossing a freight train was passing, and the signal to proceed, one of the foreign railroad's engine started to blow off steam. I started involuntarily from my seat, and it was only with difficulty that I forced myself to remain in the cab."

"Another time before that, after I had sounded the whistle for the crossing, two automobiles shot across, one right after the other, at about forty-five miles an hour. I was thinking how much better judgment those fellows would have displayed if they had stopped and waited only one minute for my train to pass when the friend shouted to me, 'There's another!' Like a flash, a large coupe went across at about sixty miles an hour. In that coupe was a little girl about five years old, known looking out of the rear window. A woman, doubtless her mother, was at the wheel. To me, it looked as though the woman was not thinking of her child, but only of not being noticed by the train. I was not certain, but that that train, rather than the girl, rather than the woman, was the cause of the accident."

"This engineer continues by asking, 'Ever you ever held up at the point of a gun?' I never was, because I never had anything that the other fellow wanted, but I have heard him describe the situation. The hole in the gun barrel looked at him as a washbowl, the bullet the size of common shells. But that feeling, when contrasted with that of the engineer who he is about to strike an automobile, is about as placid as the waters of the Amazon compared with Niagara Falls."

Possibly it is too much to expect a motorist, who risks his own life and the lives of his companions in a car, to give the slightest consideration to the locomotive engineer, or to the hundreds of passengers on the train whose safety depends upon the steady nerves of the engineer. But what grim tragedy would be prevented and suffering avoided if people would only realize that there is nothing "smart" in being a reckless fool.

Plan Labor School

Efforts will be made to form a labor college for British Columbia during the session of a school of social studies, which has been opened at Summerland, B.C. Men and women from all parts of the "Canadian west," from as far east as Winnipeg, are scheduled to attend the meetings.

The odds we give the average the back of knowledge we discover in others.

Here the patented use of this device. No waste space under the water level. A very hot boiler, absolutely safe in appearance.

Hinged lid at side of kettle for speedy filling under tap or by dipper. Being hinged it cannot fall off or get lost.

Handle, extra large, rigid, shaped to fit the hand and always cool, being rigid you have perfect control at all times.

This kettle is made in SMP Plant and SMP. It is made of pure metal and is not painted. It is not painted. It is not painted. It is not painted.

ENAMELED TEA KETTLE

Operated With Crude Oil

Doctor in Alaska Used Jack Knife and Denatured Alcohol

A tonsil operation was performed recently at Herring River on Controller Bay, 60 miles east of Cordova-Alaska, by Dr. W. W. Council, of Cordova, with a jack knife and denatured alcohol. When Dr. Council arrived at Herring River from a hunting trip he was called to handle the case. He had no implements. With the crude oil he performed the operation with success. No anesthetic was administered. The alcohol was used to sterilize the knife.

Pain In The Muscles.

Stiffness In Joints, Quickly Subdued By Nervine

Those who have tested out numerous patients will agree that where something is needed to dislodge a deep-seated, more or less chronic condition there is nothing to compare with Nervine. It is because Nervine penetrates so deeply, because it has about five times the strength of the ordinary oil preparation, that it has come to be known as King over all Pain. For rheumatic conditions, for neuralgia, for joint stiffness, Nervine works like a charm. It is the only oil preparation that gets 35 cent bottle from your dealer today.

Building Great Cathedral

A further stage in the building of Liverpool Cathedral has just been completed upon in the ceremony of laying of ground for the foundations of the central space and tower, and of the new transept.

When completed Liverpool Cathedral, which was begun in 1905, will be the second largest in the world. It is the only Anglican Cathedral in these islands to be built from the foundations since the reformation.

CHOLERA INFANTUM

Cholera infantum is one of the fatal diseases of childhood. It is a trouble that comes on suddenly, especially during the summer months and usually in the form of a severe diarrhea. It may soon be beyond aid. Baby's Own Tablets are an ideal medicine for dealing out this trouble. They regulate the bowels and soothe the stomach and thus prevent the dreaded summer complaints. They are an absolute safe medicine, being specially formulated to contain neither opiates nor narcotics or other harmful drugs. They can be used possibly to harm—they are always good. The Tablets are sold by medicine dealers or by mail at 25 cents each in Dr. Williams' Medicine Co., Brockton, Mass.

Tariff Experiment Fails

Irish Free State Will Likely Drop Most of Duties

The Dublin correspondent of the London Westminster Gazette says the tariff experiment started by the Irish Free State about two years ago has failed so badly that it is likely most of the duties will be dropped. The idea was, of course, to protect and foster Irish manufactures and industries. But the experiment has failed. The Irish Free State has not been able to protect its industries, and the prices of many goods have risen and the consumers are paying the penalty.

He cites the motor car trade among those especially affected, saying the purchase of cars has diminished considerably, while all goods except tobacco and household furniture, have suffered. The Dublin firms have been unable to pay their way.

Its Quality Sets It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in popularity, owing entirely to its marvellous usefulness in relieving and healing rheumatism, neuralgia, headache, neuralgia, and all other pains. As a specific for ear, nose, throat, and eye troubles, it is second to none. Its record is beyond reproach.

Bear Took Photograph

A camper in one of the national parks in United States, had just set up a tripod to take some pictures of mountain scenery. A bear suddenly appeared and the amateur photographer started running. When the plate was developed later, it was found that the bear in some way had tripped the shutter of the camera and had taken a good picture of the man running down the mountain side.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages, and the effort to dislodge the obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Medicine Hat Gets Convention

Medicine Hat secured the 1926 convention of the Western Canada Irrigation Association when the matter was debated at the convention in session in Kelowna, B.C.

Minard's Liniment for Rheumatism

KIDNEYS, LIVER,
BOWELS.

A Freak Lightning Bolt

Did Damage In Truro, N.S., Came From Cloudless Sky

From a cloudless sky a bolt of lightning, accompanied by a deafening thunder, descended upon Walker Street in Truro, N.S., shattered a tree, entered a house via the telephone wires, burned a telephone box, and left by an open door, in which a young child was standing.

The child was unharmed, but a pedestrian on Walker street, was stunned and several others were shocked, while telegraph instruments a quarter of a mile away were put temporarily out of commission.

There was but one bolt of lightning and one day of thunder and through it all the sun shone brilliantly and not a cloud was to be seen. A similar occurrence was recorded there three years ago.

Milner's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms with our shock or injury to the most sensitive system. They act thoughtfully and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

Eagles Travel By Aeroplanes

Two Birds Devoted Ravorous Appetite On Unaccompanied Flight

A pair of golden eagles, presented to the Zoological Garden at Stockholm by King Ferdinand of Rumania were shipped to their destination in an aeroplane. This unique mode of transporting the two sovereigns of the air was employed by orders of the Royal donor, who wished his gift to arrive at a surprise. The only effect of this unaccustomed flight seemed to have had on the two birds was to give them a ravenous appetite.

Minard's Liniment For Burns

Gas for street lighting was first used in Baltimore.

Largest Office Building

New York Structure Will Have Seven Floors Below and Thirty Above Street

Negotiations have been completed for the erection, near Grand Central station, of what will be the world's largest office building. The structure, rising 35 stories from the street level, will cover an entire city block and will cost \$10,000,000.

See complete stories, a new record in "underground skyscraper" construction, will be built below street level in a gigantic cavern cut in the granite foundation of Manhattan island. The excavation work planned is considered one of the world's notable engineering feats.

The structure will contain 21,000 cubic feet, with 1,350,000 square feet of rentable space. The building will run from Forty-third to Forty-fourth streets, between Lexington Avenue and Dupont Place.

Concentrate In Ourselves

Plan to Commemorate the Sixtieth Anniversary of the Dominion

Next Year

Canada ought to concentrate somewhat on herself, and give a little more emphasis to her own individuality. A country we derive ourselves of a certain nourishment without which patriotism can never be at its best. We have a great country and a fine people and we should, now and then, by means of a concerted national celebration, light fires on our hills, signal to each other and indicate that union of sentiment which really exists. The sixtieth anniversary of the Dominion on July 1, 1927 gives Canadians their opportunity.—Toronto Star.

Canada May Benefit

Englishman Left Fortune For Charity In United Kingdom

Nearly 200,000 pounds sterling for charity has been bequeathed by Col. J. Barlow, a magnificent supporter, in his lifetime, of Bismarck.

Col. Barlow made many visits to Canada in connection with rifle shooting. Canada may benefit under his will, as he left the residuary estate to be applied, within 21 years of his death, for such charitable purposes within the United Kingdom, Ireland, India, or any British state, colony, or dependency, to the trustees, in their wisdom, think fit.

The will adds that Col. Barlow desires that no money left by him shall be used for sectarian or political purposes.

Cleans woodwork, painted walls, tiles, linoleum, porcelain, etc.

MADE IN CANADA

This 1c Demonstration Sale positively ends Saturday, September 5th, 6 p.m.

Another Century Will See Pacific Coast Importing All Of Its Lumber From Europe

One hundred years from now the people of the Pacific coast regions of North America will be importing their lumber from Europe. So stated a recent forestry expert from Norway after an extensive journey through the timbered country of Oregon, Washington and British Columbia.

In view of the thousands of miles of sturdy standing timber on the Pacific coast today from California to Alaska, the foreign expert's words seem too ridiculous to even merit consideration. For here, upon a rugged coast-line and reaching far into the interior, is such an abundance of tree growth, close-standing and mighty, as to seem inexhaustible. No other land of earth has been so richly endowed by nature with such species as the fir, hemlock, spruce and cedar, as the Pacific coast.

Yet, despite this far-reaching, still-standing array of timber, immensely tall and thick and so vast and ever-increasing in the destruction caused by the logging industry that already there are a few lighted and nearly in agreement with the prophecy of the future, decline, and the words of Daniel Webster rise up to sound a warning to the too optimistic people of a new land.

A tree which took a thousand years to grow can be felled and cut up into saw-log lengths in half a day of the logging industry, when horses and men were used to do the work. The timber, no harm was done to the surrounding stand. Today, "high-level" logging is coming into vogue.

By this system the enormous logs are lifted by derrick-engine power, and steel cables one to two inches thick, and carried down the slope by the dangling, moving logs, many tons in weight, smash along all growth before them. Scattered and scattered, crushed to earth. Trees fifty years in the growing are broken like matches. When a modern lumbering outfit finds work in the forest, the forest is destroyed. Trees that would produce timber in another half-century are turned into waiting rot for the forest. Fortune in pile, the pole and pulp timber have been wasted. Not a seed tree even is left.

With these things in mind, the prophecy that "The Pacific coast Europe will be importing lumber from Europe in a hundred years" seems less of a far-fetched statement.

How English Dry Wet Hay.

Farmers Enthusiastic Over Process That Works Successfully

In England, where rain falls so frequently that it is no easy matter for the farmer to "make hay while the sun shines," they have hit upon a plan that makes it possible to cut grass and stack it in the midst of rainstorm without injury to the hay. Of course the wet grass cannot be put directly into the barn, which is the custom of American farmers to do by properly sun-dried. The British farmer puts up a frame made of stout poles connected by wire, and from the base of the frame he runs a pipe out to the drying machine. The newly mown hay is stacked up about the frame in a circular shape. Here it thatches itself and it starts his machine, which drives but air through the pipe to the bottom of the stack. The heated air rises through the grass, and in a day of eight hours no less than twelve tons of hay can be thoroughly dried. This has thus dried rotates most of its native value than sun-dried hay.

The drying machine can be driven by any gas-engine or engine of a farm tractor will serve. The engine operates a fan that drives into the pipe, which has been heated by passing over cylinders that are kept hot by kerosene burners.

Cuba Has Many Newspapers

There are 511 newspapers in Cuba, or 131 to each million inhabitants, the data issued by the national statistics bureau revealed. Havana province, in which the capital is situated, leads with 289. News publications in the other five provinces are as follows: Pinar del Rio, 25; Matanzas, 62; Santa Clara, 71; Camaguey, 29; and Oriente, 41.

Calgary's Population

Calgary's population in 1921, estimated by the Hendersons' directory, following a careful survey of the city, has been placed at 77,689, according to the 1921 issue which has just been published. Last year this same authority estimated the population at 75,525, showing an increase of approximately 1,160.

Buy Old Bible

One of the first Bibles that came off the press of Johann Gutenberg, inventor of movable type, is for sale in Vienna, Austria, to an English purchaser for what is reported to be a large sum. The Bible is the so-called 42-line Bible of the Melk Chapter in Lower Austria. The name of the buyer has not been disclosed.

"Can you support any man in the style to which he is accustomed?" "No, but I can ascertain how to the style in which I can support him."

Advices Canada To Get Boy Immigrants

200,000 Desirable Settlers Leave British Schools Yearly Says J. C. O'Neil

In a recent interview, Colonel J. O'Neil Smith, former Canadian government official, in London, stressed the importance of British boy immigration. This, Col. Smith said, had been realized by Australia but not appreciated in Canada. "It is," he said, "Canada has slipped behind."

"Not less than 200,000 boys leave British schools every year, crowding the London market. These should form a new immigration field from which Canada could draw very many desirable settlers."

Australia has proved the value of the young British generation to the full, but Canada has not done so. People in public life in Canada really want immigrants, especially when the Empire Settlement Act of the Imperial Parliament provides financial assistance to an extent that has hardly a limit within the possibilities of the United Kingdom.

Col. Smith emphasized the fact that if the scheme was to prove successful, the boys would have to be placed with good farmers, receive fair wages and be able to save money. That a portion of such money was placed in the provincial savings bank, so that by the time the boy reached maturity years he should have sufficient money to make a start on a farm of his own.

Big Game Being Massaged

Police Force Unable To Prevent Poaching

Sportsmen returning from the northern part of the Transvaal speak of the reckless slaughter of big game by hunters who seek supplies of lion (sun dried meat). This wanton slaughter followed a recent proclamation allowing the shooting of the Antelope or Gnu, a South African antelope having a buffalo-like head, an axe-like mane and horse-like tail.

Apparently all sorts of big game are being turned into blitting and the wagers return from the hunting grounds with full loads of game. A cull of open country is described as unsafe. Guns are being fired all day long, and there are casualties in consequence. Many animals are merely wounded and are left to die. The police force is too large enough to prevent the carnage.

Business Is Improving

Employment at the beginning of July showed a further increase in Canada of 2.3 per cent. This gain caused the index number to stand at 86.4 as compared with 84.5 in June last and with 85.9 on July 1st, 1921. With the exception of logging, in which there was a seasonal decline, and trade, which showed no general change, all industries registered increased activity on the whole, according to the Dominion bureau of statistics.

Unwell Monument

A monument to the four hundred British sailors and soldiers drowned when the British transport Transylvania was torpedoed and sunk by the Germans in the Mediterranean Sea in May, 1917, was unveiled Aug. 17 at Sportorno.

It Is the Want of Health that makes wealth for the physician.

Europe now has 13 sovereigns and 10 presidents.

Produce Success To Rain

Cotton Industry in English Cities Depends On Moisture

When one speaks of weather making a place a place, and poppers, one's first thought is naturally of health and pleasure resorts where blue skies and sunshine are usual and rain scarce. But there are many places that owe their success to bad weather.

Manchester and its neighboring cities have a damp atmosphere that is particularly adapted to the spinning of cotton, and these places would be in a fix if the rainfall were suddenly halted. For similar climatic reasons Belfast has become the world's centre of the linen trade. Belfast has 231 days out of the 365, and this suits both the growth of flax and its manufacture.

Women are naturally foolish because they were made to match the men.

Hebrideans Doing Well

That the young Hebrideans in the Red Deer district are doing well is the statement of Rev. Father John McMillan, one of the active workers in the immigration scheme which has brought several hundred settlers from the north of Scotland. They have been able to enter the labor market and make good wages, which are in turn invested in farm operations.

A Fifty-Fifty Basis

In Sweden and in Denmark, when both the father and mother are working, they must split even on payments of bills. And if the father loses his job and the mother continues working, the husband support father until he gets another job. Each has a right to know what the other is making or has in the bank.

Livestock Trade In Six Months

Shows Decrease of Thousand Head in Canadian Sales

The Dominion livestock branch market review shows that during the first six months of 1922 compared with the same period of 1921 there was a decrease in all Canada of a thousand head in the sales of cattle. Toronto showed an increase but the other markets a decrease. Hogs increased by 8400 compared with last year. Toronto alone showing a decrease. Increased offerings were particularly noticeable in the west. Sheep supplies dwindled, the markets generally showing a falling off.

A feature of the export trade was the increased shipments of cattle to Britain, they being the largest in June for any month since the embargo was removed in 1922. Exports of calves, hogs and sheep also showed an increase compared with 1921. The trade in live hogs has been slow. Canada and the Pacific coast continue good. Great Britain has more than doubled her purchase of beef, but the United States has fallen away.

Exports of pork have doubled and hogs and lamb show good gains, although the trade is still rather small.

What Is A Good Well Calf?

Points To Be Considered Before Offered For Market

This question being put to the author of "Beef Raising in Canada" published by the department of agriculture at Ottawa, the answer was, "It must be between the ages of four and eight weeks and be well fattened."

A good well calf must be a prime specimen ranging from 120 to 160 lbs. A well fattened well calf weighs from 45 to 70 per cent. of its live weight. A good calf should be comparatively small as compared with the mother and be sleek in appearance. The neck or "area" should be thick, brisket flat, the well covered, loin wide, flanks full, points of rump plump and meaty, thighs plump and scrotum or udder full. A good calf should have a generally firm touch all along the back and a sleek moist skin that will lift easily from the body. A calf with such points is ready for the market, will command a good price, and is sure to give a good carcass of meat.

Owe Success To Rain

Cotton Industry in English Cities Depends On Moisture

When one speaks of weather making a place a place, and poppers, one's first thought is naturally of health and pleasure resorts where blue skies and sunshine are usual and rain scarce. But there are many places that owe their success to bad weather.

Manchester and its neighboring cities have a damp atmosphere that is particularly adapted to the spinning of cotton, and these places would be in a fix if the rainfall were suddenly halted. For similar climatic reasons Belfast has become the world's centre of the linen trade. Belfast has 231 days out of the 365, and this suits both the growth of flax and its manufacture.

Women are naturally foolish because they were made to match the men.

Europe now has 13 sovereigns and 10 presidents.

Pioneers Continue To Come From Many Nations To Take Up Homesteads On Prairies

Time In Feed

Feed and Drink Must Supply the Necessary Life Compounds

One of the most important of the mineral constituents which enter into the tissue of the animal body is lime (calcium). Says Dr. Shutt, Dominion chemist, "Small traces of calcium compounds occur in muscle and the blood, bones and teeth are essentially phosphate and carbonate of lime. Cows need it in their pregnant state in order to supply their own needs and to build a strong skeletal structure in the developing calf. Special attention should be given to the phosphate of lime supply for ewes because for the two liters a year, their rapid growth and the general nature of their feed which is frequently so poor in lime compounds. The production of eggs and milk, Dr. Shutt points out, make large demands on the phosphate of lime content of the ration. Feed and drink must supply the necessary lime compounds. Hard water, so doubtless, one of the principal sources.

Among the forages the legumes are particularly rich in lime, alfalfa leading the list. In feeding the sheep or other leguminous hay feeders practically obviates the necessity of supplementing with lime. This special mineral-containing feeds. Meat and bone meal, bone meal, tankage and certain other packing-house by-products are rich in lime, as are mineral constituents. In winter the forage contains a large proportion of the milking by-products of wheat, corn, etc., may require supplementing with calcium rich feeds, unless good clover or alfalfa hay can be liberally fed.

A few years ago he sold his Manitoba farm, intending to retire to a well-earned rest. He had been in the west for some time, and his sons took up homesteads in the Peace River country, he was unable to resist the temptation to go on, so he came back to his old home, and he has been here ever since.

Canada May Have New Ocean Port

Glacier Bay Likely to Provide Outlet For Yukon Area

The Vancouver Sun publishes the following from Vancouver: "Canada may have a new ocean port, giving direct access to the sea from Yukon Territory and obviating the present necessity of crossing the States territory from Skagway, according to statements made by J. K. Pender, Dominion government geologist, who passed through on his way to the head of Glacier Bay, an inlet west of Lynn Canal.

"When the boundary between Alaska and Canada was delimited, it ran east and west several miles north of the head of water in Glacier Bay, crossed a field of solid ice or glacier, connected with the waters of the bay. Chilling climate, unusually warm weather, or some unusual opening of the ice bed has caused the ice to disintegrate, Mr. Pender declares, with the result that the open water of Glacier Bay now extends past the boundary line into Canadian territory."

"An outlet is feasible, providing a route can be found to connect with the Yukon River or other streams of the interior."

Saskatchewan Butter Production

Increases 27.9 Per Cent. Or 638,591 Pounds in July

Saskatchewan production of creamery butter in July jumped another 27.9 per cent. or 638,591 pounds, when the production for the month was 2,925,291 pounds, against 2,286,700 pounds in the corresponding month of last year.

Production for the first seven months of this year totals 9,305,222 pounds, as compared with 7,395,073 pounds for the same period last year, or an increase of 1,909,743 pounds, 25.8 per cent. The largest portion of the province is still making the production of butter considerably greater in production month by month.

Procuring Caribou For Museum

New York Man Goes To B.C. For Special Specimens

Proceeding to the Cassiar country for the purpose of getting special specimens of the Caribou caribou for the American Museum of Natural History, New York, Mr. and Mrs. James Light Clark have just returned from the Yukon Territory. They intend going to Wrangell and from there to Telegraph Creek, head of navigation to the Stikine River, where they will outfit for two months in the Cassiar. Mr. Clark, who is assistant director of the American Museum, has made several trips procuring specimens for that institution.

Sounds That Travel Far

An experimenter in a balloon reports hearing a man's shout at 1,600 feet, the croaking of frogs in a marsh 2,000 feet, the toll of a bell and music of an orchestra at 4,500 feet, church bells tolling at 5,000 feet, a rifle shot at 5,500 feet, the toll of a bell and music of an orchestra at 5,500 feet, the whistle of a locomotive at 10,000 feet.

"B.B." To Be Very Rare

Twenty-five years from now tobacco will be as uncommon as leopards today, says Dr. A. Saksby, of the London Medical Institute.

Maintaining Ford Leadership

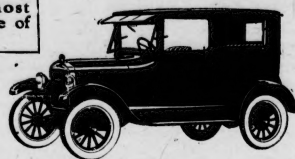

—Highest Quality at Lowest Cost

Introducing
many improve-
ments in the
world's most
popular line of
motor cars.

The Fordor Sedan

Color—Gray with black enamel running gear. Com-
pact body. Nickel-plated radiator shell and hood. Chrome
leather-cloth sun visor, closed at both ends. Standard
equipment includes motor, cord tires, demountable rim,
dashlight, windshield wiper, rear view mirror and dash
lamp.

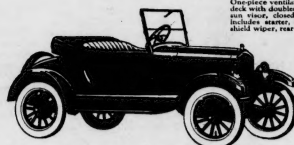

The Tudor Sedan

Color—Dark Blue with black enamel running gear. Al-
loy steel body. Nickel-plated radiator shell and hood. Chrome
leather-cloth sun visor, closed at both ends. Standard
equipment includes motor, cord tires, demountable rim,
dashlight, windshield wiper, rear view mirror and dash
lamp.

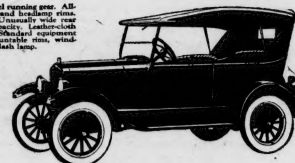

The Coupe

Color—Dark Blue with black enamel running gear. Al-
loy steel body. Nickel-plated radiator shell and hood. Chrome
leather-cloth sun visor, closed at both ends. Standard
equipment includes motor, cord tires, demountable rim,
dashlight, windshield wiper, rear view mirror and dash
lamp.

The Runabout

Color—Black. All-steel body. Double ventilation wind-
shield. Wide rear deck with compartment space greatly
increased. Tool box under seat. Standard equipment
includes motor, cord tires, demountable rim, dash-
light, windshield wiper and rear view mirror.

The Touring

Color—Black. All-steel body of streamline design. Double
ventilation windshield. Ford leather-cloth sun visor, closed
at both ends. Standard equipment includes motor,
cord tires, demountable rim, dashlight, windshield wiper and
rear view mirror.

Farmers Attention

We are quoting the following on Gas Oil, Distillate,
and Lubricating Oils, F.O.B. Your Town. On orders for
250 gallons or over we will deliver F.O.B. your farm.

Gas Oil, 4 points higher than kerosene	22c per gal.
Distillate 36-40 Be Gravity	20c per gal.
Cosden Lubricating Oil, the Velvet Oil—	
Motor "E" Light	75c per gal.
Motor "EF" Medium	85c per gal.
Motor "AT" Heavy	95c per gal.
Motor "BB" Extra Heavy	95c per gal.
Motor "BB" Super-Heavy	95c per gal.

(Cosden Oil is made of a pure paraffin base stock, with
the paraffin removed by a centrifugal process. We abso-
lutely guarantee this oil to be one of the finest quality
oils that you can buy for motor use. Motor "BB" we
highly recommend as a splendid tractor oil.)

We suggest that you secure a trial 5 gallon can of the
quality you are using at our Agents.

WORLD HAPPENINGS
BRIEFLY TOLD

Cardiff, Wales, is advertising for tenders for 500 wooden boxes and expects to get them from Scandinavia.

An expedition has left here to explore the eastern shores of the North Arctic Ocean, proceeding later to Cape Hope, Alaska.

Lent, Col. C. E. Meredith has taken over his duties as secretary of the League of Nations Society of Canada, succeeding H. G. Richardson, recently resigned.

The delegates of the Empire Press Union, enroute to the Imperial Press Conference to be held in Australia, were given a civic welcome at Auckland, N.Z.

Professor Henri Louis Bergson, France, has resigned as president of the committee of International Intellectual co-operation of the League of Nations, on account of ill-health.

The Soviet Government, dissatisfied with some of its foreign embassies and legations, is planning a sort of travelling club which will visit all over the world and check up on the diplomats.

It has been announced that all the provinces of the Dominion would be represented in the livestock exhibit at the Royal Winter Fair in Toronto. It was also stated British Columbia would send an exhibit of fur animals.

The British Columbia Legislature will assemble for its annual session on October 26. A fall session is preferred by a majority of members of the house to a spring sitting, such as had been postponed earlier in the year.

Senator Webster has been in England making arrangements for the shipment of supplies of Welsh coal to Canada. In case of a coal miners' strike in the United Kingdom, the business will profit very materially by the Canadian trade.

The probe conducted by chief inspector of prisons, J. McNeil, into the food served to prisoners in the jails and institutions of Ontario has revealed that there is no general objection to the menu and staple diet prescribed by the regulations.

Effects Being Saved

New Invention Saves Oil Company
50,000,000 Gallons of Gasoline a Year

"Breathing losses" of gasoline, estimated at 50,000,000 gallons a year by the bureau of mines, are being rapidly cut down by "breathing tanks" developed for gasoline tanks by the Standard Oil Company of Indiana, according to a statement made recently by the American Chemical Society.

"Breathing losses" are the evaporation of gasoline in tanks due to the expansion of the gas. This may be prevented by the use of a "breathing tank" which allows the gas to escape from the tank through a vent, otherwise the pressure would increase or decrease the tank.

The Standard Oil invention consists of a balloon which captures the escaping gas during the day and gives it back to the tank at night. The same gas is breathed over and over again without loss. The process was worked out by Robert E. Wiley, H. W. Atwell, E. P. Brown and E. W. Chenoweth, of the Standard Oil Company of Indiana.

King Presents Colors
To Welsh Guards

These Bear Record of War History of Regiment

New colors were recently presented to the Welsh Guards. For the two years since the formation of the regiment the Welsh Guards have carried colors on which no name of a battle has been emblazoned, but at a picturesque service at Windsor Castle, the King presented them with new colors that were a record of their glorious war history. The King said: "Ten years ago, when your regiment was raised, I presented its first colors at Buckingham Palace. Shortly after that period the regiment was called upon to fight for its country, and today its noble deeds in the Great War are inscribed upon your colors."

Good Fur Catch

The first catch of the fur season's bounty from the North by the steamer Albatross, from Alaska, has arrived in Edmonton, and its value is approximately \$100,000. Good catches of furs were reported throughout the north.

Walking machines, which can produce in a few hours the amount of work on shoes that would normally take place in six months of use, are employed for testing the quality of shoes.

A questionnaire recently issued in England shows that religious books stand next to fiction in favor with the reading public.

Wants To Establish
Own Medical Register
Irish Free State Has Soundly Defeated
Keel of Profession

The death knell of the medical profession in the Irish Free State has been sounded, in the opinion of many doctors, by an announcement of the government's intention to establish a separate, independent medical register and cut loose from the British General Medical Council, by which the medical faculty of Ireland hitherto has been controlled. The government's result of the decision, which is to be made effective next February, will be that doctors qualifying in the Free State will be unable to practice in Great Britain or Northern Ireland, while physicians from those places will be barred from Southern Ireland.

The government's decision, however, must be ratified by the Irish parliament, and medical men, it is stated, will seek to obtain majorities against the proposal both in the senate and Dail Eireann.

President Cosgrave had issued an explanatory statement, seeking to allay the fears of those opposing the bill, and also to point out the many advantages from the arrangement, he says, the government does not expect any serious reactions.

"It is inconceivable with our constitutional status," he adds, "that an important profession have its centre of gravity and disciplinary headquarters in another country."

Reaches Top Record

68,000 Auto Licenses Issued in Saskatchewan This Year
Increase of 12 per cent. private auto licenses has been issued in Saskatchewan, according to report of P. W. Kerr, provincial license inspector. This is an increase of approximately 4000 over the record number issued in 1924. Truck licenses issued this year to date number 6,000, an estimate of which shows that heavy and dealer licenses issued so far would total approximately 1,500 each.

Transferring of licenses from one car to another is another matter which is given considerable trouble, he said. In changing cars, the owners must secure a transfer of license through the department. The mere transfer of the license plates from one car to another, is not sufficient. Persons who do not see to the proper transfer of the license are actually violating the law and are liable to a fine, Kerr pointed out.

Many people are under a false impression as to the issuing of high price licenses, Mr. Kerr said. These are not issued on and after July 1, but any person purchasing a car after October 1 may secure a license at half price, but must furnish an affidavit that the car had not been used in the province prior to that date.

Find Moscow Very Dull

Foreign Envoys Do Not Have Much Social Life

To relieve the tedium of life among the foreign diplomats and newspaper correspondents, the Moscow government has adopted the expedient of giving free theatrical entertainments once a month. Early in June a distinguished gathering of ambassadors, consuls and Soviet commissioners were the guests of the Soviet Government at a concert given at the State Opera House, which was frequented by ballet dancers, operatic pieces and vocal solos by Bolshevik Russia's best artists. Moscow has not seen many fine limousines since the days of the Czar. The flags of all nations were seen, the French tricolor being especially conspicuous.

It was believed the arrival of Jean Harlowe, the new French ambassador, would relieve the tedium that prevails the foreign missions, but the hopes of those who sought greater social activity have not been disappointed. The French ambassador and his wife live modestly at the former Russian minister's mansion, and already have adopted the quiet, unostentatious social customs of their colleagues in the diplomatic missions.

Had Learned To Be Brief

A member of the British General Assembly, who prides himself in his calculating brevity to the young mind, is telling a good story about himself. His son, who has returned to finish his summer term at an English school, started, if not gratified, him by a wire as follows: "S. O. S. R.D.S.B. R.V.D." The lad has now further distinguished himself, in reply to an anxious letter as to his final examination. "Hymn 125, verses 5, last two lines, convey, 'Borrowed time, borrowed time, borrowed time'—Exchange."

A good reputation is sometimes useful as a parachute to the man who flies rapidly in the wind.

There are more than 10,000,000 papers in the world.

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment—just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

Bethel United Church

"The Challenge of the United Church of Canada" will be the theme for the morning service next Sunday, September 20, at 11 o'clock. At this service the pastor will present the message of the moderator of the General Council of the United Church, Rev. Dr. Geo. C. Pidgeon.

At the evening service at 7:30 o'clock will speak on "What does God require?", an old text with a present day message.

The choir of Bethel church has been reorganized, under the direction of W. G. Moffatt, and will take the leadership in the services of praise every Sunday evening. Mid-week services are now resuming on Wednesday evenings at 8 o'clock, and a cordial invitation is extended to all to attend these meetings.

Nazarene Church Announcements

Friday night, Young People's meeting, Miss Mary Valetsko is the speaker.

Saturday, 8:30 p.m., the Prayers Band will meet at the church.

Lord's day, 10:30, Mr. Chester Laing will preach his farewell sermon as assistant pastor of the local church. Also he will farewell at Greenbank school, 3 p.m.

Sunday night, a great evangelistic meeting. The pastor will bring the message, subject "The Two Mafactors."
